Equality Statement

Leicestershire Partnership NHS Trust (LPT) aims to design and implement policy documents that meet the diverse needs of our service, population and workforce, ensuring that none are placed at a disadvantage over others. It takes into account the provisions of the Equality Act 2010 and promotes equal opportunities for all. This document has been assessed to ensure that no one receives less favourable treatment on the protected characteristics of their age, disability, sex (gender), gender reassignment, sexual orientation, marriage and civil partnership, race, religion or belief, pregnancy and maternity.

Due Regard

LPT will ensure that Due regard for equality is taken and as such will undertake an analysis of equality (assessment of impact) on existing and new policies in line with the Equality Act 2010. This process will help to ensure that:

- Strategies, policies and services are free from discrimination;
- LPT complies with current equality legislation;
- · Due regard is given to equality in decision making and subsequent processes;
- · Opportunities for promoting equality are identified.

Please refer to due regard assessment (Appendix I) of this policy.

Definitions that apply to this Policy

Prescription Forms (Manual FP10HNC)	Hand-written prescriptions uniquely numbered pre-printed stationery for GP's and Hospitals. Issued in pads of 50 forms. (Green)
Prescription Forms (FP10P)	Hand-written prescriptions uniquely numbered pre-printed stationery for Non-medical prescribers. Issued in pads of 50 forms. (Lilac)
Authorised Prescribers	Registered medical or non-medical practitioners working within the Trust.
Authorised Specialties	Those specialist departments registered to receive FP10 prescription forms.
CDAO	Controlled Drugs Accountable Officer
Ulysses	Electronic Reporting Form (Safeguard).
LCFS	Local Counter Fraud Specialist.
LSMS	Local Security Management Specialist.
NHSCFA	NHS Counter Fraud Authority
Prescriptions Forms (Electronic FP10ss)	Blank prescriptions for use with the Trusts electronic prescribing system, issued in packs of 100 forms.
Specialty Code	Code used to identify a specific prescriber or specialty.
NMP	Non-Medical Prescribers.

Due Regard

Having due regard for advancing equality involves:

- •Removing or minimising disadvantages suffered by people due to their protected characteristics.
- •Taking steps to meet the needs of people from protected groups where these are different from the needs of other people.
- Encouraging people from protected groups to participate in public life or in other activities where their participation is disproportionately low.

QUICK REFERENCE GUIDE

.

For quick reference the guide below is a summary of actions required. This does not negate the need for the document author and others involved in the process to be aware of and follow the detail of this policy.

- 1. Prescription forms are a valuable asset and must remain protected and secure at all times.
- 2. Clear records will be kept on prescription stationery stock that is received and distributed. This will allow a full audit trail in the event of any security incident.
- 3. Stocks of prescription stationery should be kept in a secure room with access limited to those responsible for prescription forms.
- 4. Distribution of prescription forms within the Trust should be discreet.
- 5. Clear records will be kept of the prescriptions ordered by and issued to authorised prescribers.
- 6. Prescribers are responsible for the security of prescription forms once issued to them and should ensure they are locked away securely when not in use.
- 7. In the event of a loss or suspected theft or misuse of a prescription form, the prescriber or staff member should notify the Head of Pharmacy or Pharmacy Services Manager and complete an Electronic Incident Reporting form on Ulysses, as soon as possible.
- 8. In the event of an incident, the Head of Pharmacy will conduct an investigation and/or request advice from the Local Counter Fraud Service, and/or notify the police, as appropriate.

1. Purpose of the Policy

This policy has been developed to ensure the security of prescription forms against theft and abuse and details action to be taken for the reporting of any loss or theft of prescription stationery. It has been formulated in response to the NHS Counter Fraud Authority document "Management and control of prescription forms".

This Policy applies to all staff throughout Leicestershire Partnership NHS Trust, particularly to all authorised prescribing and dispensing staff, and those nonprescribing staff who manage or administer prescription forms across all areas and at all levels within the Trust

2. Summary and Key Points

This policy is for prescribers of medicines (including contractors, locum staff, NMP's in all settings, pharmacists, dispensing staff, heads of Pharmacy, staff who manage and administer prescription forms in the NHS, accountable officers for controlled drugs, Local Security Management Specialists (LSMSs) and Local Counter Fraud Specialists (LCFSs).

The policy document defines the precautions necessary to reduce the risk of prescription loss, theft and fraud in services provided by the Trust and describes the process that must be followed when such an incident occurs. The document discusses a range of measures available to prevent and tackle the problem of prescription form theft and misuse at a local level and outlines the recommended action for when an incident occurs.

3. Introduction

Prescription forms are a valuable NHS asset and must remain protected and secure at all times. Systems must be in place to ensure records are kept of prescription forms issued and that those in receipt of prescription forms are aware of their responsibility to ensure the security of prescription forms in their possession.

It is important that all staff are vigilant and adhere to the guidance contained within this policy.

4. Process

4.1 Prescription Stationery Stock Control

Clear and unambiguous records will be kept of prescription stationery stock that is received and distributed (suitable form is attached in Appendix F & G). Records will be kept of

· What has been received, i.e. quantities, specialty code, serial numbers

- · Where items are being stored
- · When prescription forms are issued to a specialty or individual prescribers
- Details of who issued the forms
- To whom prescriptions forms were issued, along with the serial numbers of the forms
- The serial numbers of any unused prescription forms that have been returned
- Details of prescription forms that have been destroyed (all records relating to FP10 prescription issues must be kept for 3 years from the date of the last record made)

4.2 Ordering

All new specialties and NMP's will be registered on the NHS Business Services Authority (NHSBSA) database before prescription forms can be ordered. The Pharmacy Services Manager or NMP Lead is responsible for registering new specialties or individual prescribers with the NHSBSA.

The Pharmacy Services Manager / NMP lead and approved deputies are responsible for ordering stocks of prescription forms on behalf of the Trust and are registered with the NHSBSA for this purpose. The process for ordering prescription forms is detailed within local procedures. For security reasons the procedure will not be available within this policy.

New prescription forms will not be issued to prescribers who have left or moved employment or who have been suspended from prescribing duties. All unused prescription forms relating to the prescriber should be returned to the person who issued them, who should in turn update their records. The prescription forms should then be destroyed. This process should be witnessed by an independent member of staff and the record updated accordingly.

4.3 Delivery

The contracted secure printer for the NHSBSA will deliver the prescription forms to the Trust. The forms will be in a sealed package which has to be signed for. Deliveries of prescription forms should be stored securely and must not be left in a public place or an area where there is unsupervised access.

The process for delivery of prescription forms to hospital pharmacies, hospital outpatient clinics, health centres and community hospitals, etc., is detailed within local procedures. For security reasons the procedure will not be available within this policy.

4.4 Receipt and Storage

A record will be kept of stocks of prescription forms that are delivered and stored. These records will be kept at each stage of the delivery process, e.g. by Pharmacy, by specialty and by prescriber. The following information should be recorded on a stock control system:

- Date of delivery
- Name of the person accepting delivery
- What has been received (quantity and serial numbers)
- · Where it is being stored
- · When it was issued
- Who issued the prescription forms
- · To whom they were issued
- · The number of prescriptions issued
- · Details of the prescriber
- Serial numbers of the prescriptions issued

Records of serial numbers received and issued should be retained for at least three years.

Stocks of prescription stationery should be kept in a secure room with access limited to those responsible for prescriptions forms, where a secure room is unavailable a safe or locked cupboard with restricted access may be used. Keys or access rights should be controlled and an authorisation procedure implemented that includes details of those allowed access. This should allow a full audit trail in the event of any security incident.

Prescribers are responsible for the security of prescription forms once issued to them and should ensure that they are locked away securely when not in use and never left unattended. Prescribers should keep a record of the serial numbers of prescription forms issued to them. This will help to identify any prescriptions lost or stolen overnight.

4.5 Distribution Hospital Prescribers

Distribution of prescription forms within the hospital should be discreet. The container used to distribute the forms should be sealed to prevent access during transit. Those awaiting collection should be stored securely and not left in a public place or in an area where there is unsupervised access. When distributing forms between hospital sites, the driver should sign for the consignment.

On distribution within and between hospitals and their sites a designated person must sign for the prescription forms received from delivery staff and record the serial numbers.

Community Based Prescribers

Upon receipt of the prescription forms, a process must be in place to record the relevant details of prescriptions received. The prescriber will ensure there is a system in place at their base to store prescription forms securely promptly upon delivery.

The process for delivery of prescription forms to hospital pharmacies, hospital outpatient clinics, health centres and community hospitals, etc., is detailed within

local procedures. For security reasons the procedure will not be available within this policy.

4.6 Security of Computer Systems

Single sheet prescription forms (FP10ss) for use with the ePrescribing systems should be afforded the same security controls as prescription pads. It must be recognised that these forms are acceptable in handwritten form, so it is not acceptable to leave the forms in printer trays when not in use.

All staff who have access to the ePrescribing computer system should have an individual password. Passwords should only be known to the individuals concerned and systems will prompt users to change them on a regular basis. Staff should not share their passwords with their colleagues as prescribing information will be attributed to the individual whose details are printed at the bottom of the FP10ss form. Each member of staff is liable for all drugs ordered in their name.

4.7 Transporting and Taking Prescription Stationery Home

Teams that work across many sites, visit patients at home or cover a large geographical area will need to transport prescriptions and may need to take them home at the end of the day. Prescribers working in the community should take suitable precautions to prevent the loss or theft of prescriptions, such as ensuring prescription pads are carried in an unidentifiable lockable carrying case and out of site in a vehicle (e.g. glove compartment or boot). Only a small number of prescriptions should be transported based on that days' anticipated workload to minimise loss. Staff should also record the serial numbers of prescriptions they are carrying. As far as possible, prescriptions should not be left unattended in a vehicle. If they have to be left unattended in a vehicle, they should be stored out of sight, in a locked compartment (e.g. glove compartment or boot) and the vehicle should be fitted with an alarm. At the end of the shift, prescriptions can be taken home if necessary. The prescriptions should be stored in a safe and secure location in the house. Prescriptions must not be left in the car overnight.

4.8 Posting of Completed Prescriptions

Ideally, prescriptions are handed to the patient/parent at the time of their appointment. However it can be necessary to provide a prescription to a patient without the need to see them. For the convenience of our patients, it is possible to post completed prescriptions. When posting is necessary, the following should be considered to ensure that this process is done as safely as possible:

- Post the prescription to a nominated Pharmacy rather than the patient's home.
 This will reduce the risk of delivery error and someone else in the household intercepting the prescription.
- 2. Ensure that the address (of the pharmacy) is correct.

- 3. It is considered good practice to post prescriptions for controlled drugs via recorded delivery as its' journey can be tracked.
- 4. Patients/parents should be notified once the prescription is posted, so they have a rough time frame as to when they can collect it.

4.9 Lost or Stolen Prescription Forms

In the event of a loss or suspected theft of a prescription form, the person discovering the incident should initiate a search and try to establish the circumstances under which the forms have gone missing. If the missing forms cannot be accounted for, the matter should be reported to the Head of Pharmacy (or deputy) for further action.

In the event that a patient reports a lost prescription form, the incident should be recorded in the Ulysses reporting system. Before a replacement prescription is provided, a risk assessment should be undertaken to ensure that the reported loss is genuine and not an attempt to commit prescription fraud; a risk assessment should include consideration by the Team Leader / Team Manager and prescriber of the circumstances surrounding the loss of the prescription and what support the patient might require to arrange dispensing of the prescription.

As this prescription is likely to be signed by an authorised signatory with all the relevant data, the loss should be treated like all other prescription losses and local escalation and reporting procedures followed.

4.10 Reporting Missing/Lost/Stolen or Suspected Misuse of NHS Prescription Forms

In the event of a loss or suspected theft or misuse of a prescription form, the prescriber or staff member should notify the Head of Pharmacy as soon as possible. In the event of such an incident, the Head of Pharmacy will conduct an investigation and/or request advice from the LCFS and/or notify the police, as appropriate.

The member of staff reporting the incident should complete the Missing/loss/stolen NHS Prescription notification form (Appendix D) and an incident form on Ulysses. Any theft or loss report must include the following details:

- Date and time of loss/theft
- Date and time of reporting loss/theft
- · Place where loss/theft occurred
- Type of prescription stationery
- Serial numbers
- Quantity
- Details of the LSMS to whom the incident has been reported.

Prescription losses should be shared with the local intelligence network. Staff may also report any concerns about fraud to the confidential NHS Fraud and Corruption Reporting Line on 0800 028 4060.

4.11 Duplicate and spoiled prescriptions

If a duplicate prescription is accidentally written or if an error is made in a prescription, best practice is for the prescriber to do one of the following:

- Put a line through the script and write 'spoiled' on the form, signed and dated by the prescriber
- Cross out the error, sign and date the error, then write the correct information

There may be reasons for a prescription to be deemed spoilt other than error. Rather than just destroying or returning these forms, best practice is to retain them securely for local auditing purposes for a short period before destruction.

4.11 Destruction and Disposal

New prescription forms should not be issued to prescribers who have left or moved employment or who have been suspended from prescribing duties, and all unused prescription forms relating to that prescriber should be recovered and securely destroyed. The person responsible for the recovery and destruction of forms should be in a position of suitable seniority. This will require liaison with the Head of Pharmacy, NHS England and subsequently NHS Business Services Authority (NHSBSA) to ensure the suppliers of the forms are aware of prescriber changes. In the case of personalised forms, suppliers will reject order details that do not match the data supplied by the NHSBSA.

Prescription forms which are no longer in use should be securely destroyed (e.g. by shredding) before being put into confidential waste, with appropriate records kept (Appendix I). The person who destroys the forms should make a record of the serial number of the forms destroyed. Best practice would be to retain these prescription forms for local auditing purposes for a short period prior to destruction. The destruction of the forms should be witnessed by another member of staff. Records of forms destroyed should be kept for at least 3 years.

4.12 Alerts

The NHSCFA operates a national alert system to notify LSMS and LCFS networks of potential threats, individuals, organisations, requests for information from the police, security breaches and risks of fraud and corruption. The local LSMS/LCFS officer(s) should inform the Head of Pharmacy of any potential incident who, in turn, will cascade the information to Departmental Pharmacy Managers for transmission within the pharmacy organisation.

4.13 Incident Investigation

The level of investigation of missing, lost or stolen prescription forms will depend on the nature of the incident. In the event of an incident, the Head of Pharmacy will conduct an investigation and/or request advice from the LCFS, and/or notify the police, as appropriate.

Any incident must be recorded, investigated and communicated in accordance with the organisation's Incident Reporting Policy.

5. Duties within the Organisation

- The Head of Pharmacy is responsible for overseeing the ordering, receipt, storage, transfer, access to and overall security of prescription stationery.
- The Pharmacy Services Manager will act as a deputy or second point of contact in the absence of the Head of Pharmacy and will be responsible for keeping an account of the prescriptions ordered and issued to authorised specialties.
- NMP Leads will be responsible for ensuring that suitable arrangements are in place for keeping an account of the prescription forms ordered and issued in their directorate.
- Operational Managers / Service Leads will be responsible for ensuring that records are kept of the prescriptions ordered by and issued to authorised prescribers.
- Authorised prescribers will be responsible for the safe keeping of prescription forms in their possession at all times, and for maintaining records of prescription form serial numbers issued to them.
- All staff are responsible for ensuring the security of prescription forms and the reporting of incidents to the Head of Pharmacy or their deputy.

5.1 The following people can write NHS prescriptions:

- General practitioners/doctors/GP locums
- Hospital prescribers can prescribe medication to be dispensed in community pharmacies. Prescribers working in hospital outpatient substance misuse clinics can also issue special instalment NHS prescriptions.
- Non-Medical Prescribers For further detail regarding the professional groups to which this applies and their authority to prescribe, refer to the Trust NonMedical Prescribing Policy.

6. Training needs

There is no training requirement identified within this policy however, staff are responsible for reading and acting within the Secure Handling and Storage of Prescription Stationery Policy. The staff carrying out the duties as described in this policy must have agreed with their manager that they are competent to do so. Staff

and their managers have a joint responsibility to highlight any training needs which may arise in the implementation of this policy.

7. Monitoring Compliance and Effectiveness

The effectiveness in practice of all procedural documents should be routinely monitored (audited) to ensure the document objectives are being achieved. The process for how the monitoring will be performed should be included in the procedural document.

The details of the monitoring are:

- For the Pharmacy Service The Head of Pharmacy will monitor compliance with the policy as part of the Medicines Management Audit process. Results of audits will be reported annually to the Medicines Management Committee and escalated where required.
- 2. For all Departments or individual prescribers using FP10HNC / FP10SS / FP10P Prescription Forms Departments should implement their own methods for monitoring compliance and maintaining an audit trail for those forms issued to them.

Ref	Minimum Requirements	Evidence for Selfassessment	Process for Monitoring	Responsible Individual / Group	Frequency of monitoring
1	Prescribing / Use within Trust guidelines.	-	Review usage	Medicines Management Group (MMC)	Annually
2	Review records management.	-	Review usage	Local	Local

8. Standard Performance Indicators

No performance indicators are attached to this policy.

9. References and Bibliography

10. Fraud, Bribery and Corruption consideration

The Trust has a zero-tolerance approach to fraud, bribery and corruption in all areas of our work and it is important that this is reflected through all policies and procedures to mitigate these risks.

- Fraud relates to a dishonest representation, failure to disclose information or abuse of
 position in order to make a gain or cause a loss. Bribery involves the giving or receiving of
 gifts or money in return for improper performance. Corruption relates to dishonest or
 fraudulent conduct by those in power.
- Any procedure incurring costs or fees or involving the procurement or provision of goods or service, may be susceptible to fraud, bribery, or corruption so provision should be made within the policy to safeguard against these.

If there is a potential that the policy being written, amended or updated controls a procedure for which there is a potential of fraud, bribery, or corruption to occur you should contact the Trusts Local Counter Fraud Specialist (LCFS) for assistance.

Appendix A - The NHS Constitution

The NHS will provide a universal service for all based on clinical need, not ability to pay. The NHS will provide a comprehensive range of services

Shape its services around the needs and preferences of individual patients, their families and their carers	Х
Respond to different needs of different sectors of the population	
Work continuously to improve quality services and to minimise errors	Х
Support and value its staff	
Work together with others to ensure a seamless service for patients	Х
Help keep people healthy and work to reduce health inequalities	X
Respect the confidentiality of individual patients and provide open access to information about services, treatment and performance	Х

Appendix E - Incident Response

NATURE OF INCIDENT	WHO SHOULD BE CONTACTED?
Discrepancy in prescription forms ordered and received.	Contact supplier Ask the driver to remain on-site while the supplier is contacted.
Following enquiries with the supplier, if discrepancy in prescription forms ordered and received cannot be accounted for, and forms are still missing.	Notify the Head of Pharmacy or deputy with overall responsibility for prescription forms at the organisation, the CDAO, LSMS or nominated security management specialist and police as required. Report the matter using the organisation's incident reporting system (Ulysses). The matter must be reported as a security incident and an alert/warning circulated locally and/or nationally. Serial numbers of the missing forms must be submitted to the NHS Protect database using the appropriate notification form.
If prescription forms are lost through negligence or by accident.	Notify the Head of Pharmacy or deputy, LSMS and police as required. Report the matter using the organisation's incident reporting system (Ulysses). The matter must be reported as a security incident and an alert/warning circulated locally and/or nationally. Serial numbers of the missing forms must be submitted to the NHSCFA using the attached notification form (Appendix D).
If prescription forms are stolen.	Contact the police and report the matter using the organisation's incident reporting system (Ulysses). Notify the LSMS or nominated equivalent. The matter must be reported as a security incident and an alert/warning circulated locally and/or nationally. Serial numbers of the missing forms must be submitted to the NHSCFA using the attached notification form (Appendix D).
If it is suspected that a presented prescription form is forged.	Check with Prescriber then, if appropriate, notify the, police and contact NHS Fraud and Corruption Reporting Line on 0800 028 40 60.
If it is suspected that prescription forms are being misused.	Check with Prescriber then, if appropriate, contact NHS Fraud and Corruption Reporting Line on 0800 028 40 60; contact the police.

Section 1

Name of activity/proposal	Secure Handling and Storage of Prescription Stationery Policy
Date Screening commenced	02/06/2023
Directorate / Service carrying out the assessment	Enabling Services
Name and role of person undertaking this Due Regard (Equality Analysis)	Andrew Moonesinghe – Pharmacy Services Manager

Give an overview of the aims, objectives and purpose of the proposal:

AIMS:

This policy has been developed to ensure the security of prescription forms against theft and abuse and details action to be taken for the reporting of any loss or theft of prescription stationery. It has been formulated in response to the NHS Business Services Authority's Protect document "Security of Prescription Forms Guidance".

This Policy applies to all staff throughout Leicestershire Partnership NHS Trust, particularly to all authorised prescribing and dispensing staff, and those non-prescribing staff who manage or administer prescription forms across all areas and at all levels within the Trust.

OBJECTIVES:

This policy is for prescribers of medicines (including contractors, locum staff, NMP's in all settings, pharmacists, dispensing staff, heads of Pharmacy, staff who manage and administer prescription forms in the NHS, accountable officers for controlled drugs, Local Security Management Specialists (LSMSs) and Local Counter Fraud Specialists (LCFSs).

The policy document defines the precautions necessary to reduce the risk of prescription loss, theft and fraud in services provided by the Trust and describes the process that must be followed when such an incident occurs. The document discusses a range of measures available to prevent and tackle the problem of prescription form theft and misuse at a local level and outlines the recommended action for when an incident occurs.

Appendix K – Data Privacy Impact Assessment Screening

Data Privacy impact assessment (DPIAs) are a tool which can help organisations identify the most effective way to comply with their data protection obligations and meet Individual's expectations of privacy.

The following screening questions will help the Trust determine if there are any privacy issues associated with the implementation of the Policy. Answering 'yes' to any of these questions is an indication that a DPIA may be a useful exercise. An explanation for the answers will assist with the determination as to whether a full DPIA is required which will require senior management support, at this stage the Head of Data Privacy must be involved.
